

DEKRA – Electrical (Field Service) Engineer

What are you going to do?

Traveling the world. Traveling together with 2-3 colleagues. Visiting customers with our unique generator inspection robot. That's what you will do as an Electrical Engineer. Together with a group of approximately 50 colleagues, you will work on advanced techniques for Non-Destructive Testing (NDT). With your colleagues you use advanced NDT measuring methods worldwide, in combination with carrying out electrical tests. This is often combined with self-developed mechanical equipment. You go to places where this is normally not possible, but you are there! To perform electrical tests on generators.

Your responsibilities

- Preparing, conducting and reporting inspections at locations worldwide;
- Carrying out tests with our self-developed ARGIS system (Advanced Robotic Generator Inspection System);
- Setting up and developing a new package of electrical measurements, then carrying them out and sharing your knowledge with colleagues.
- You have at least MBO+/HBO working and thinking level, preferably in the field of electrical engineering, electronics or energy technology
- You preferably have knowledge of generators; You are customer-oriented, results-oriented and careful
- You are willing to travel (40% of your working time is spent working on location)
- We are an international organization and much of your work takes place abroad
- English is a piece of cake for you
- You are willing to obtain NDT certificates and carry out tests
- You have no problem traveling a lot. 40% of your time will be spent working abroad

What do we offer you?

- Visit unique locations abroad with the generator inspection robot;
- A team of specialists around you, who are ready for you and willing to help where necessary;
- An attractive salary and participation in our success sharing scheme;
- We think it is important that you stay fresh and focused and that is why you have 25 vacation days and 13 ADV days.

But what we think is most important is giving space to Ambition, Autonomy and Variety. Working at A-employer DEKRA means working in a challenging position, within a great team of independent experts and in a dynamic and international environment. Read more about a career at DEKRA [here](#).

About us

DEKRA is the world's largest non-listed expert organization in the field of testing, inspection and certification. DEKRA was founded in 1925 with the mission of inspecting vehicles to ensure road safety. Today, DEKRA offers a wide range of services, ranging from product testing, inspections, audits and advice to certification. We operate in

more than 60 countries to improve safety on the road, at home and at work worldwide. View all our services here. We have a clear vision: as a leader in testing, certification and inspection, we ensure that products, assets and technologies are safe, reliable and sustainable - we give people confidence. And you are welcome! Discover more about DEKRA here.
