

DEKRA – High Voltage AC and DC Cable Systems Inspector

What will your role involve

Step into the dynamic world of DEKRA, where **innovation** and **safety** go hand in hand!

Within the Industrial Safety department, we work with a team of experts to serve a diverse clientele with a wide range of innovative products. Our work is **dynamic**, especially with the HV-DC submarine interconnector cable systems, which are in full development. International standards are regularly expanded or updated, or new technical recommendations are released.

As a **High Voltage AC and DC Cable Systems Inspector**, your task is to assess the results of type tests, pre-qualification tests, and related tests performed in high voltage laboratories of manufacturers based on international standards and client specifications. To do this well, you preferably also have knowledge of the application and installation of submarine cable systems.

You will be involved in multiple projects simultaneously for different clients **worldwide**, with an focus on **Europe**. Your time will be divided between inspections at client locations and processing inspection results into reports for our clients. Additionally, you will work closely with your direct colleagues. Ultimately, you will be responsible for several accounts concerning the continuation of projects, income, and accurately performing all related administrative tasks.

Responsibilities

- Independently attend tests in laboratories of manufacturers, spending about 70-80% of your time in these client labs;
- Conduct inspections on AC and DC high voltage submarine and land-cable systems;
- Evaluating the test results based on guidelines in international standards and experience;
- Report test results and evaluations in reports;
- Maintain project administration, cost management, and invoicing.

Your profile

You come to this role equipped with extensive knowledge and expertise, and additionally you:

- A Bachelor's degree in Electrical Engineering or a related field;
- Work experience in a high voltage laboratory or with a manufacturer of high voltage products;
- You are a sparring partner for test engineers, project managers, engineering specialists, and management at both manufacturers and their end clients (often transmission grid operators) who frequently attend test programs;
- You do not mind extensive travel. 70-80% of your work time will be abroad, sometimes even on Dutch holidays;
- Irregular working hours are not an obstacle for you;
- Given the international nature of our organization, a good command of the English language.

Here is what we offer

- Competitive salary and comprehensive benefits;
- A variable performance **bonus scheme**;
- **25 vacation days** and **13 ADV (Additional Days Off)** for ample relaxation;
- Travel and remote work allowances;
- Discount on various insurance plans;
- Abundant opportunities for **career growth**, supported by multiple training programs;
- Engage in a challenging role within a cohesive team of proficient experts in a dynamic and international setting.

More about DEKRA

DEKRA is the world's largest non-listed expert organization in testing, inspecting, and certifying according to international safety and sustainability standards. Founded in Germany in 1925, the company's mission was to inspect vehicles to ensure traffic safety. Today, we offer a wide range of services, from product safety testing, audits, and inspections to damage assessment and HSE consulting. We operate in over 60 countries to ensure safety on the road, at home, and in the workplace worldwide. [Explore all our services here.](#)

We have a clear mission: as a leader in testing, certification and inspection, we ensure that products, assets, and technologies are safe, reliable, and sustainable – building trust between people and technology. And you are welcome to join! [Discover more about DEKRA here.](#)
