

A photograph of a man and a woman in a laboratory setting. The man, on the left, is wearing a green safety vest over a dark shirt and glasses. The woman, on the right, has blonde hair and is wearing a green top. They are both smiling and looking at each other. In the background, there are various pieces of electronic equipment and test benches.

DEKRA – Smart Metering Engineer

What will your role involve

The energy transition requires reliable and accurate smart meters. DEKRA is growing and building a new **Smart Energy Metering** team. Are you an enthusiastic engineer with a background in electrical engineering? Would you like to apply your technical expertise while helping to build a new service offering within an international organization? Then this is your opportunity!

As a **Smart Metering Engineer**, you will be one of the first experts in this field at DEKRA. You will perform testing on smart energy meters, evaluate measurement results, work with international standards, and act as a key technical partner for both customers and colleagues.

In addition, you will actively contribute to the development of test methods, accreditations, and the further growth of our Smart Metering activities.

Responsibilities

- Testing AC and DC energy meters according to global standards such as IEC 62052, IEC 62053, ANSI C12, OIML, and others;
- Preparing test plans, measurement reports, and technical documentation;
- Interpreting test results and standards such as IEC 62052, IEC 62053, ANSI C12, MID, OIML, and related standards;
- Supporting accreditation and certification processes;
- Acting as the technical point of contact for customers;
- Collaborating with colleagues from EV Charging, Electrical Safety, Electronics, and Cybersecurity;
- Staying up to date with developments in smart metering and intelligent energy networks.

Your profile

- Bachelor's or Master's degree in Electrical Engineering, Electronics, or a related field;
- Interest in measurement and testing technologies;
- Strong communication skills;
- Good command of both Dutch and English;
- Independent and entrepreneurial mindset;
- Affinity with the energy transition.

Here is what we offer

- An attractive salary and excellent employment conditions;
- A variable **profit-sharing scheme**;
- Plenty of time to recharge with **25 vacation days** and **13 additional ADV (reduction of working hours)**

days;

- Travel and remote working allowance;
- Discounts on various insurance policies;
- Extensive **career development opportunities** and training programs to support your continuous growth;
- A challenging position within a team of independent experts in a dynamic and international environment.

DEKRA: The Global Partner for a Safe and Sustainable World

With more than 100 years of experience, DEKRA is a leading global organization in testing, inspection, and certification. What drives us is not the past, but the future. In a world that is constantly changing, we ensure that products, processes, and technologies are safe, reliable, and sustainable. This enables real progress to continue. Read more about DEKRA [here](#).

In the Netherlands, we offer a wide range of services. Our laboratory in Arnhem tests and certifies products. We provide audits for companies that want to demonstrate their efforts in quality, sustainability, and safety through certification. And if something does go wrong despite a strong focus on safety, our claims experts support the investigation and handling of damages, ranging from vehicle damage and personal injury to business losses and damage in and around homes, and much more. View all our services [here](#).

Without trust, progress comes to a standstill. Would you like to help build a safe and sustainable future? We would be delighted to welcome you to our team!
