

DEKRA – Test Engineer Electronics Copy Copy Copy Copy Copy Copy Copy

The role

Do you have a passion for electronics and want to be part of a brand-new project? DEKRA is building a completely new test department for smart energy metering and you can be there from the start!

As a Test Engineer Metering, you'll work together with experienced engineers to test smart energy measurement equipment. You'll read electronic schematics, set up and connect test systems, and perform measurements according to international standards. No day is the same: you'll work with modern equipment, contribute ideas for improvements, and help build an entirely new test lab.

What you'll do

- Test electronic metering equipment (AC/DC).
- Build and connect test setups.
- Read and interpret electronic schematics.
- Collaborate with engineers and project leaders on new testing methods.

Your profile

- A completed MBO level 4 education in Electrical Engineering (or higher).
- Interest in electronics, measurement, and testing.
- Accurate work style and strong attention to detail.
- You get energized by building something new.

Our offer

Working on innovative testing projects in the energy sector.

- A competitive salary.
- Plenty of room to learn and grow.
- Flexible working hours and excellent employment conditions.
- A team that is building something new – with your input from day one.

Do you get excited about technology, testing, and pioneering?

More about DEKRA

DEKRA is the world's largest independent expert organization in testing, inspection, and certification according to international safety and sustainability standards. The company was founded in Germany in 1925 with the original mission of inspecting vehicles to ensure road safety.

Today, we offer a wide range of services, including product safety testing, audits, inspections, damage assessment, and HSE consultancy. We operate in more than 60 countries and contribute to safety worldwide – on the road, at

home, and in the workplace.

Discover all our services here (optional link).

Our mission is clear: as a leader in testing, certification, and inspection, we ensure that products, systems, and technologies are safe, reliable, and sustainable – building trust between people and technology. And you are very welcome to be part of that mission.
